

Panel session

QoS in practice: experiences and perspectives

Catania, february 3, 2005

Why QoS?

Unhappy customer makes unhappy provider

Why QoS?

An happy customer makes an happy provider

Panel program

- **TILAB-** Telecom Italia: Maurizio Siviero.
 - The Telecom Italia experience in the Voice-Data backbone.
 - First experiences and perspectives for QoS in NGN.
- **WIND:** Luigi Vismara.
 - Network scenario and requirements in multiservice IP networks.
 - Network overview and planned services in 2005-2006.
 - ITU and 3GPP standards, what's covered and what's missing: an e2e perspective.
 - The WIND experience: guidelines for the definition of service classes (CoS).
- **Vodafone:** Alberto Bona.
 - IP services and service differentiation in mobile radio networks.
 - end-to-end data services optimization.
- **Fastweb:** Andrea Lasagna.
 - The Fastweb experience.
 - QoS for broadcasting and point-to-point video services.
- **Selenia:** Maurizio Bisio.
 - 'mission critical' networks: reliability, security and integration with other networks.
 - QoS guarantee for privileged traffic.
- **Alcatel:** Agostino Damele.
 - QoS in IP triple-play multi-service networks
 - Multi-edge architecture over IP/Ethernet
 - Broadband Aggregation for triple-play services over Optical Networks
